Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-11, drawn to a data distribution system, comprising a plurality of data sources, a data vending machine, a data selection apparatus, and a data receiving apparatus, classified in class 705, subclass 26.
- II. Claim 12, drawn to a data searching apparatus, comprising a search condition setting apparatus operated by a user to set a search condition desired by the user, classified in class 705, subclass 26.
- III. Claims 13-19, drawn to a copied data detecting system, comprising a data reproducing apparatus and a data checking apparatus, classified in class 705, subclass 26.
- IV. Claims 20-24 and 25-26, drawn to a data reproducing apparatus reproducing digital data, comprising a first determining apparatus determining whether said reproduction apparatus specifying information matches reproduction apparatus ID information unique to said reproducing apparatus and a display apparatus for visually reproducing and displaying said digital data, classified in class 705, subclass 26.

Art Unit: 3625

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a search condition setting apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a search condition setting apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

Inventions II and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II

A telephone call was made to George Neuner on September 15, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
